

Fueling High Caliber Careers

OSGeo & Open Source

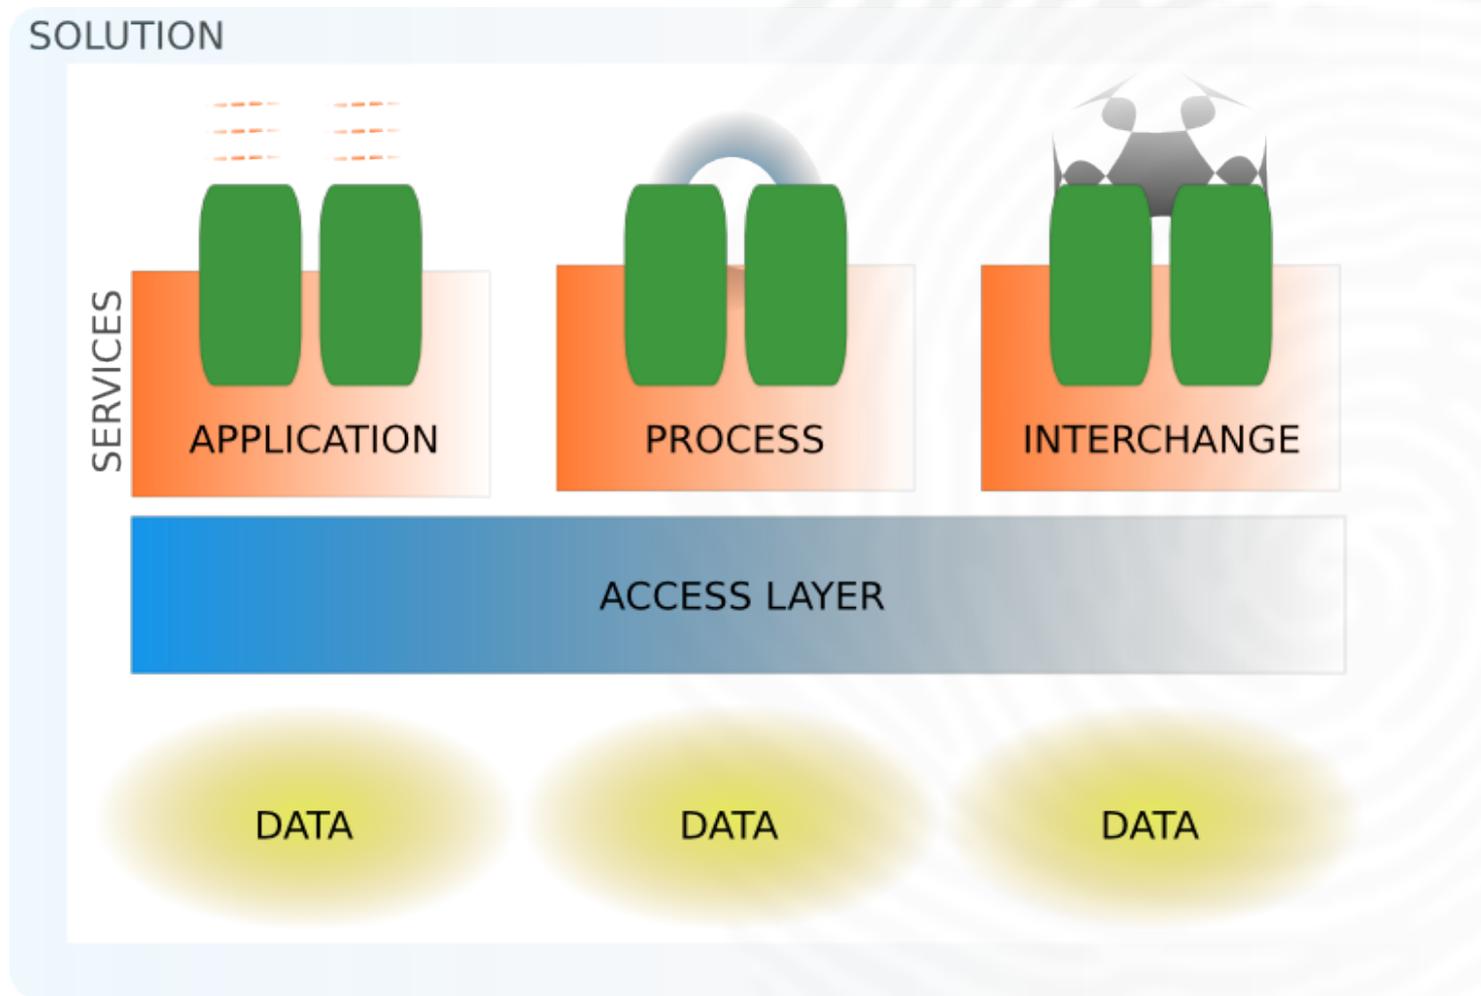

Tyler Mitchell
1-May-2008

Personal Introduction

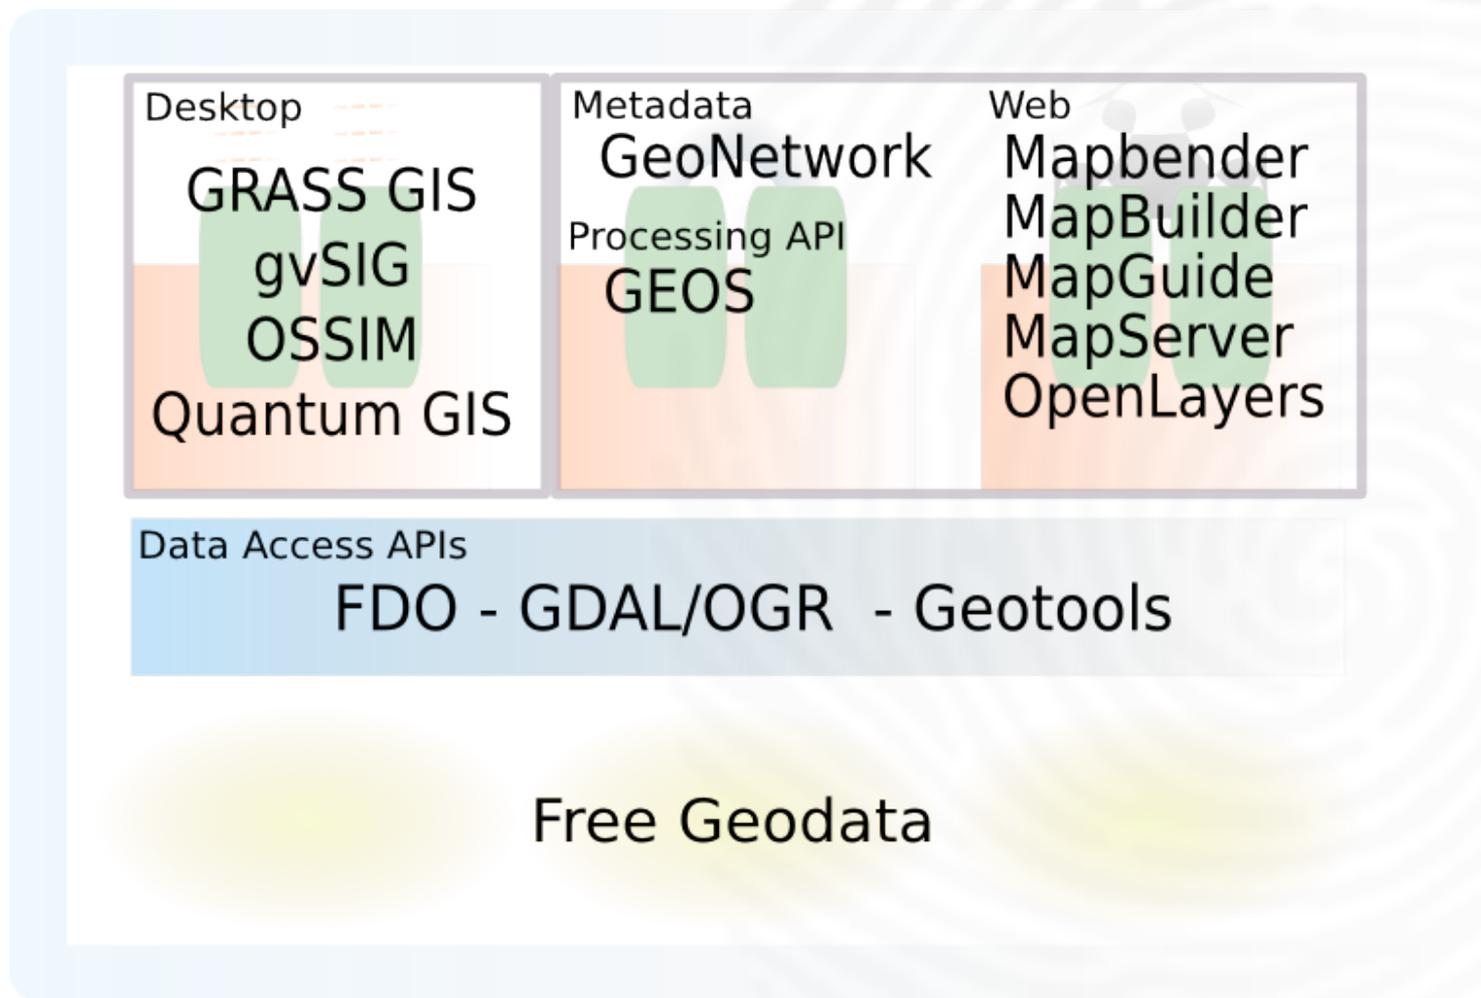

- Geographer
- GIS Professional
- Author, *Web Mapping Illustrated*
- Open Source Geospatial Foundation (OSGeo) Executive Director & Charter Member

Software Stack

OSGeo Open Source Project Stack

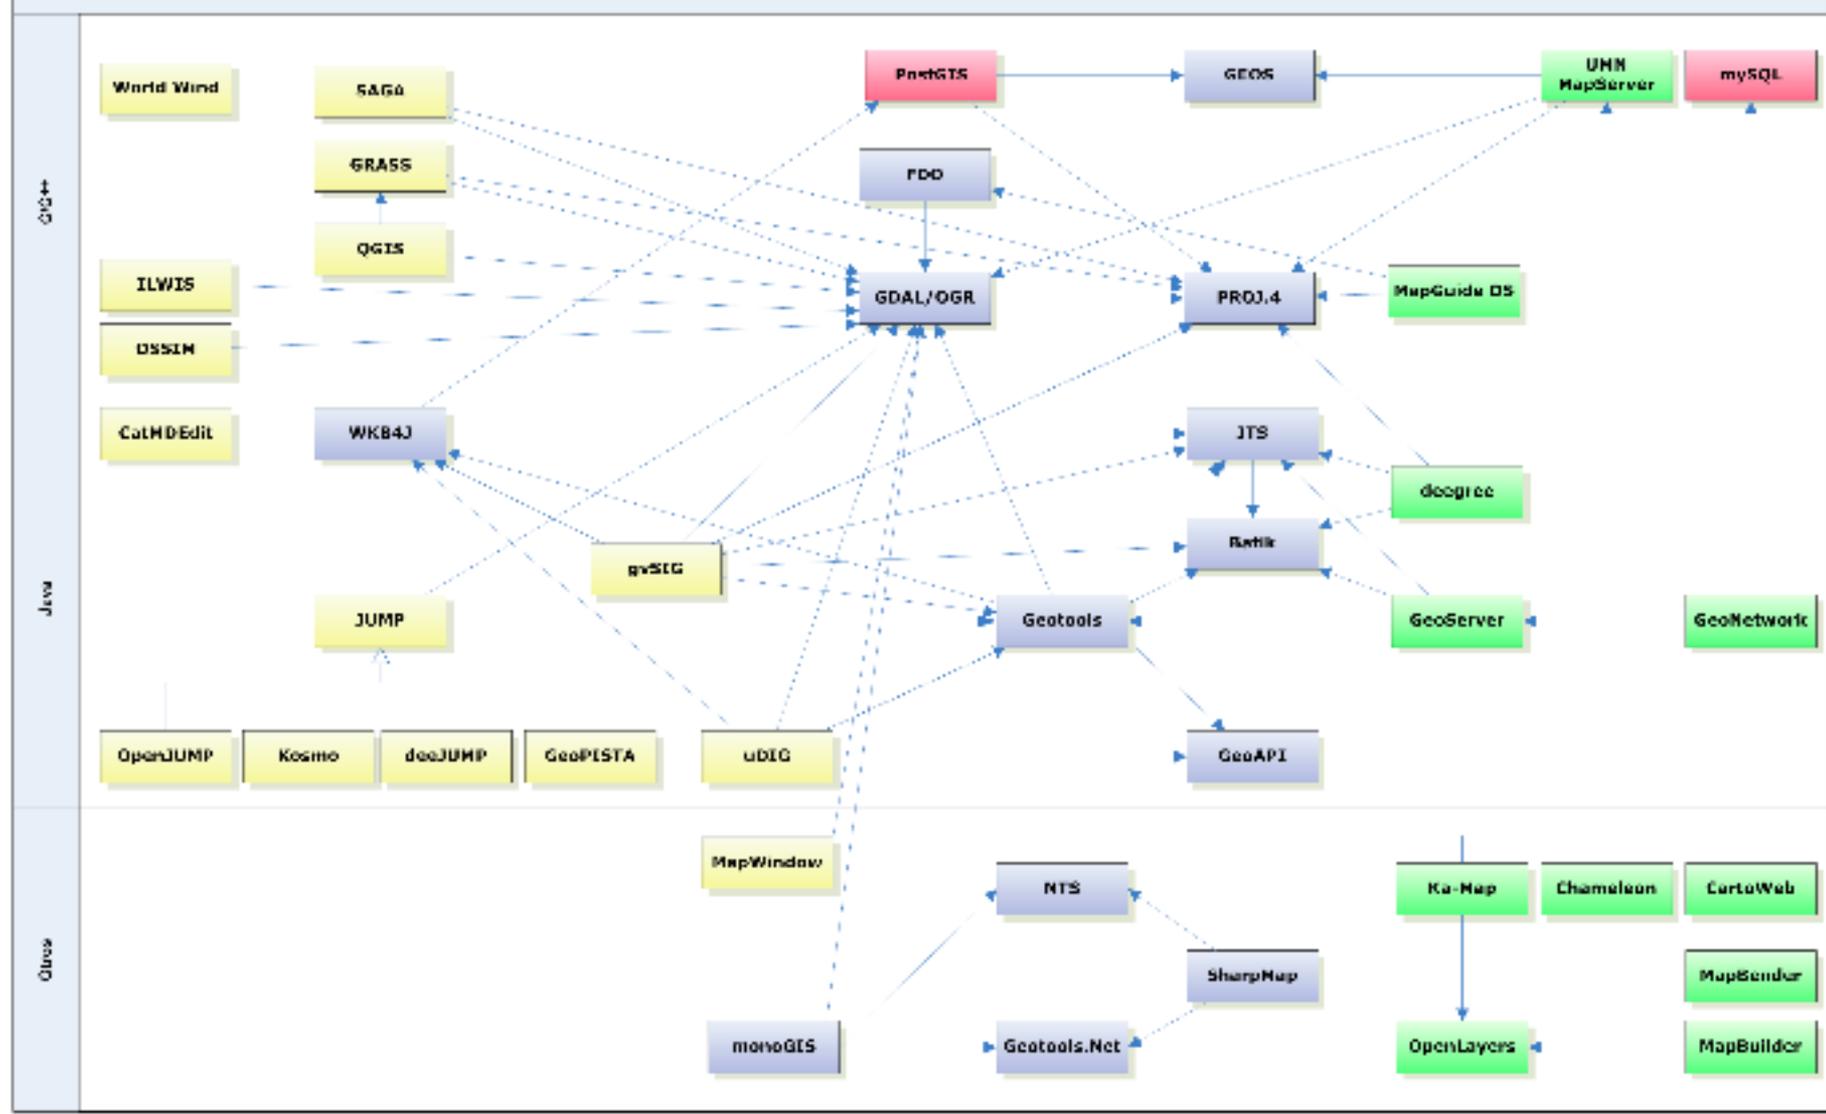

Project Stats

- From ohloh.net
- Missing gvSIG and deegree

Replacement Cost of your Stack	
This calculator estimates how much it would cost to hire a team to write each project from scratch. The cost is the sum of each project cost. More »	
Include	<input type="text" value="Markup And Code"/>
Codebase	5,450,649
Projects	14
Contributors	200
Effort (est.)	1474 Person Years
Avg. Salary	\$ <input type="text" value="55000"/> year
\$ 81,072,382

Behind The Stack

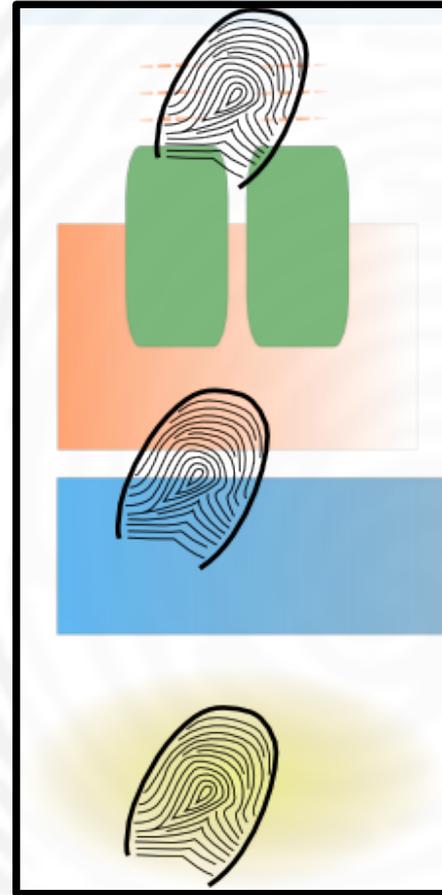

What Holds Your Project Together?

Human Role

- Collect / maintain data
- Transport info.
- Build apps
- Implementing standards
- Users

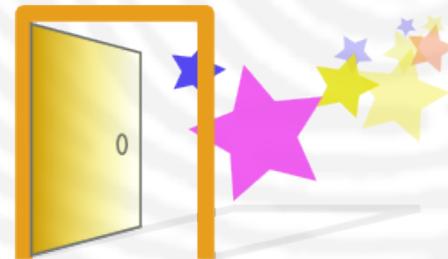

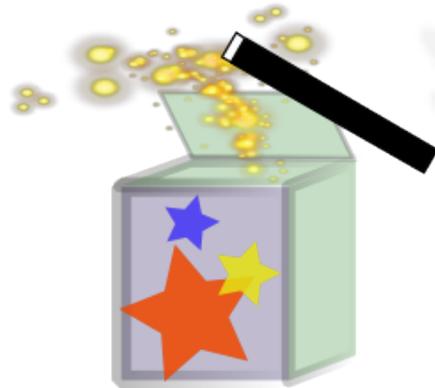

Critical role but
easily overlooked

Project Success & Quality

- Quality depends on capability
 - Limited by your abilities & staff
 - Breadth of skills/experience required
- Need agility and an eye to the future
 - standards
 - platforms
 - data issues
 - what's next?

Help Wanted

Why Open Source Helps

Employers

- Broaden your project possibilities
- Diversify technology dependencies
- Encourage enthusiasm from communities
- Invest in your team – keep them/find them
- Flexibility as a *perk*

Why Open Source Helps

Employees

- Build skills of interest – at home, school
- Learn on the job
- Develop a lifelong professional toolkit
- Make your skills portable – e.g. from job-to-job
- Show you are keen

Beyond Open Source

- Open standards (OGC)
- Complex architectures – db, geo, web...
- Platform independence
- Future reliability / re-use
- Black box suspicion – “*more than one way*”

Being In-Demand

- Broaden skills
- Diversify projects
- Be flexible
- Know standards
- Invest in others while building capacity
- Build projects with less lock-in

Tools for the Future

- Databases
- Geospatial analysis
- Mapping
- Operating systems
- Web hosting
- Web services
- Communication technology
-?

Conclusion

- Be in demand
 - Skilled help hard to find
 - Diverse skills are invaluable
- Build the skills and team for the future
- Mixing in open source can help

Looking Ahead

- High quality information management
- Powerful SDI's
- Meeting standards requirements

Impossible without good staff and tools
