

Free and Open Source Software for Geospatial Conference 2009

20 - 23 October 2009
Sydney Convention & Exhibition Centre

<http://2009.foss4g.org/>

Sydney Australia: a City with a Wealth of Experience

Program

FOSS4G is the international "gathering of tribes" of open source geospatial communities, where developers and users show off their latest software and projects. The theme for 2009, "User Driven", reflects the migrating focus on users, and integration of geospatial components into systems. The spatial industry is undergoing rapid innovations and Open Source, and Open Standards are two of the driving forces. FOSS4G 2009 will introduce a Geospatial Integration Showcase, a practical demonstration of Open Source and Proprietary applications working together through Open Standards to solve business problems.

Sponsorship and Display Area

Various levels of sponsorship complemented by a comprehensive display area will be held in conjunction with the Conference. The display area will cover a wide range of products and services in the field of geospatial and open source software. Any companies wishing to participate as a sponsor or promote their products/ services within the display area are encouraged to contact the Conference Managers.

Who should attend?

- ① Geospatial technical opinion leaders
- ① Developers of geospatial software
- ① Managers interested in how open source is being put to practical use around the world
- ① Companies looking to connect with open source communities and align their development with Open Source trends and OGC standards
- ① Users of geospatial softwares seeking a more collaborative relationship with their tools and the people who make them

Expression of Interest

If you are interested in attending the FOSS4G 2009 Conference and would like further information, go to the conference website <http://2009.foss4g.org/> and complete the online expression of interest form.

Host City

Sydney is a dazzling and vibrant cosmopolitan city built around one of the world's most beautiful harbours. Sydney has a wide range of attractions including art galleries, museums, theatres, opera and music as well as parks, gardens, sparkling beaches and the harbourside Taronga Zoo. Sydney's restaurants reflect the multicultural diversity with an exemplary choice in all cuisines. Why not try surfing at our glorious beaches, or sailing on our magnificent harbour. For more information about Sydney's attractions go to the conference website: <http://2009.foss4g.org/>
