

FOSS4G

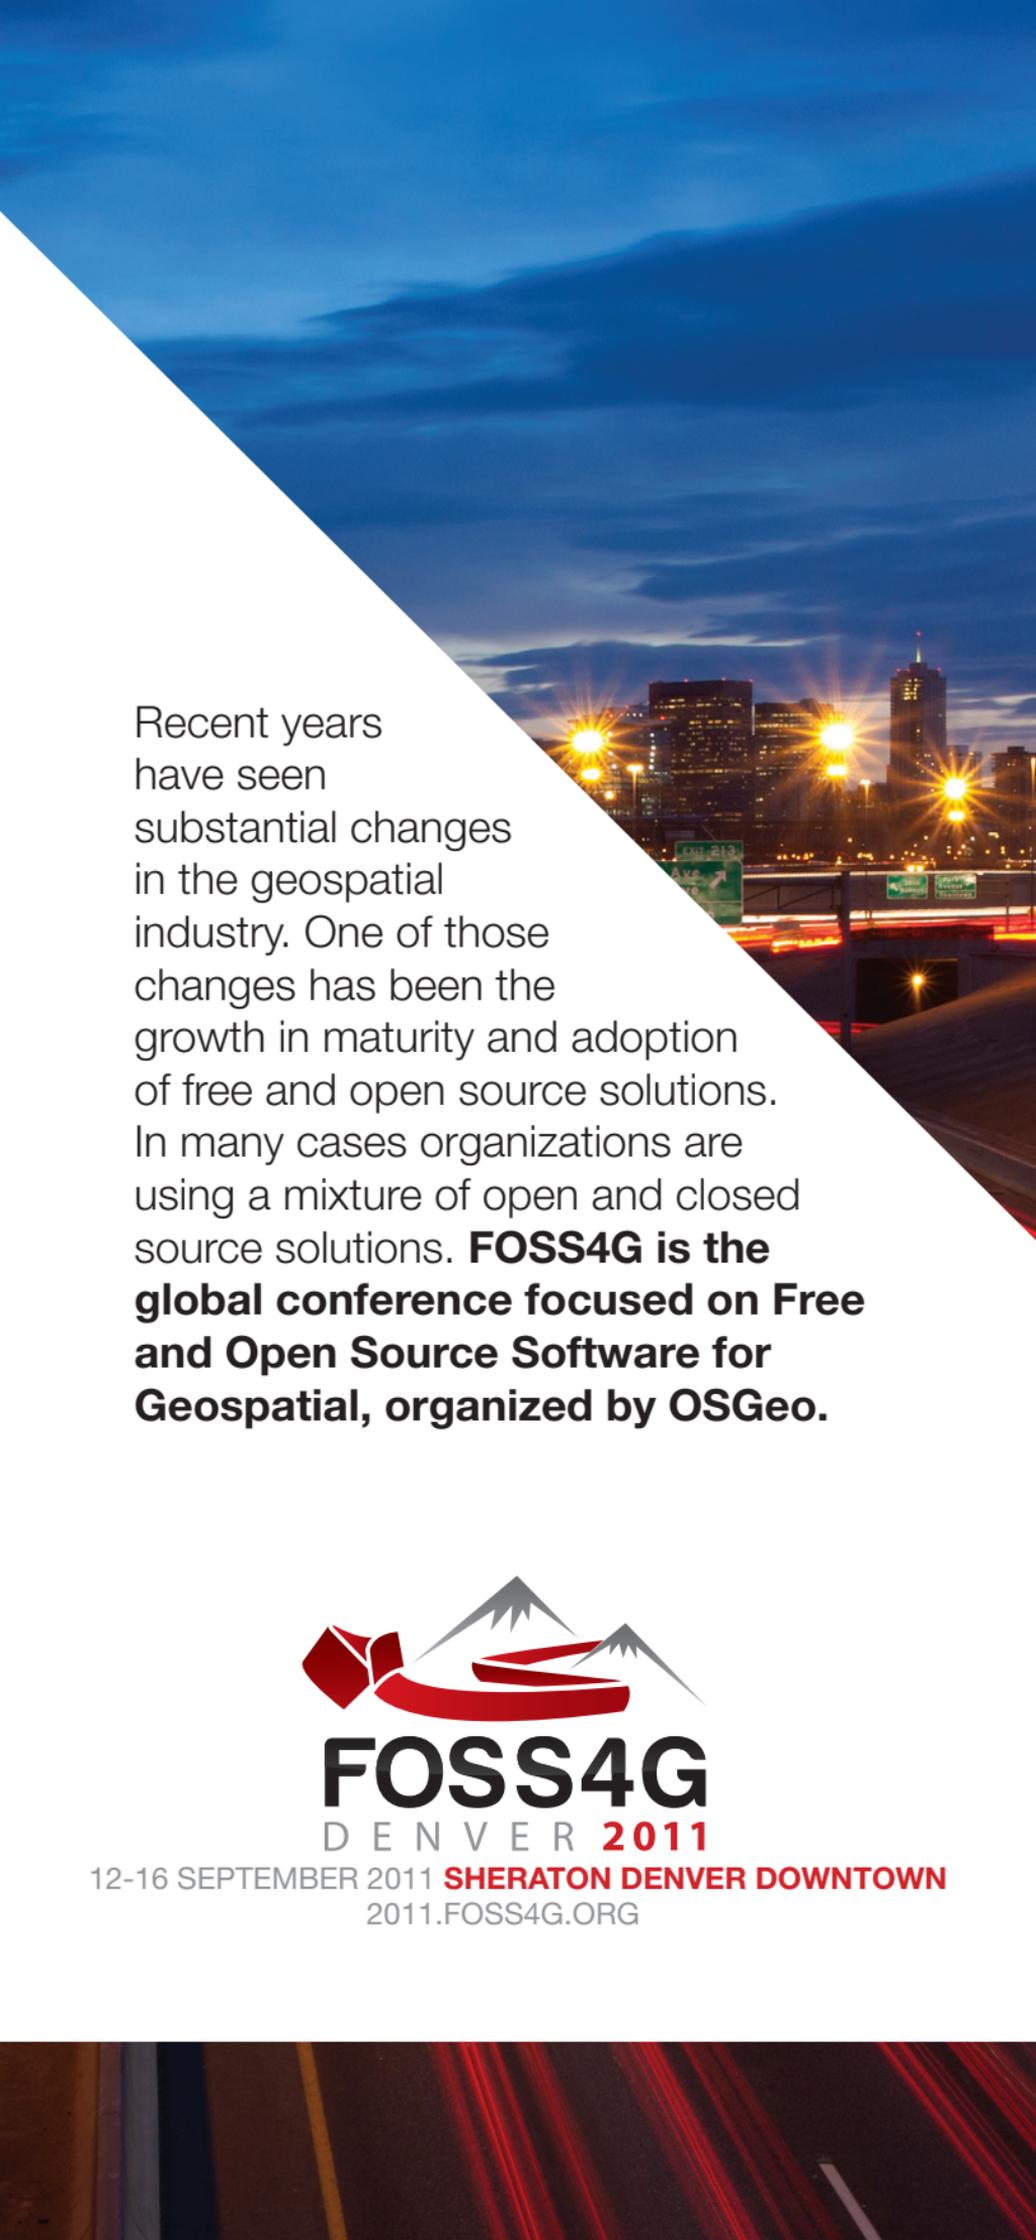

D E N V E R 2011

12-16 SEPTEMBER 2011 SHERATON DENVER DOWNTOWN
2011.FOSS4G.ORG

Free and Open Source Software for Geospatial Conference

State of the Map, the annual international conference focused on OpenStreetMap, is also being held in Denver immediately before FOSS4G. We encourage you to attend both events!

A nighttime photograph of a city skyline, likely Denver, with several skyscrapers illuminated. In the foreground, there are light trails from traffic on a highway, including a prominent red light trail. The sky is a deep blue with some clouds. A white diagonal shape cuts across the left side of the image, containing text.

Recent years have seen substantial changes in the geospatial industry. One of those changes has been the growth in maturity and adoption of free and open source solutions. In many cases organizations are using a mixture of open and closed source solutions. **FOSS4G is the global conference focused on Free and Open Source Software for Geospatial, organized by OSGeo.**
