4 May, 2012

Dear Antony and Committee members,

**Free and Open Source Software for Geospatial (FOSS4G) Conference**

On behalf of Cranfield University, I am pleased to support the UK Organizing Committee's bid to host the Free and Open Source Software for Geospatial (FOSS4G) Conference in 2013 in Nottingham, UK.

Cranfield runs a Masters programme in Geographical Information Management and we seek to teach our students the importance of Open Source tools within the GI community. It would be our hope that some of our students might be able to present at this important conference.

We look forward to participating in the FOSS4G Conference and hope you are successful in your bid to encourage the wider open source geospatial community to join you in Nottingham for FOSS4G 2013.

Yours sincerely

Dr Stephen Hallett
