# Get involved in *2011*
Google Summer of Code

The *Google Summer of Code* program is designed to encourage student participation in open source software development. The *Open Source Geospatial Foundation* is looking for students to join us in making 2011 the best Summer of Code yet! We'll be offering successful student contributors a $5,000 USD stipend, enabling them to focus on their coding projects for three months.

The project ideas range from the depths of computer science graph theory to the heights of 3D visualization.

Proposed projects: GDAL, GeoServer, GeoTools, GRASS, Mapbender, MapGuide Open Source, MapServer, OpenLayers, QGIS, PostGIS, ...

Your own ideas are more than welcomed - they are encouraged.

Student applications open:
28 March – 8 April 2011
